NUTRITION TIP OF THE WEEK FROM THE KSC FITNESS CENTERS: Tips to prevent soda from damaging kids teeth: Kids who drink soda or other sugary beverages during the day can take steps to prevent acid from damaging enamel on their teeth.

- After drinking soda, kids should rinse their mouth with water to wash away excess sugar that bacteria consume to create acid. This helps neutralize acids and reduces bacteria by 30 percent.
- Drinking soda from a straw can reduce sugar exposure to their teeth and prevent staining tooth surfaces.
- Drink soda from a can, not a bottle with a replaceable cap, to reduce sipping throughout the day, which can exacerbate acid attacks.
- Chew sugarless gum. Chewing gum can triple the regular amount of saliva in the mouth, which is nature's buffer against cavities.

MISUSE OF THE NASA INSIGNIA: Use of the computer templates, containing the NASA Insignia, for the production of NASA letterhead in electronic form is not authorized and should be removed from all computer systems. The Associate Administrator for Public Affairs has requested all NASA centers use only the printed NASA letterhead stationery. "The use of computer file NASA Insignias to custom design stationery provides opportunities for image manipulation and standards degradation which will adversely reflect the professional image of the Agency." If not approved for specific applications, electronic images of the NASA Insignia ("meatball") should be removed from computer systems. (TA-E1)
